Moved by Mr. Burton that reports from Messrs. Fischer and Smallwood re the Indignants be accepted. Cd.  
Moved by Mr. Santee that report from Mr. Smallwood re Municipality indebtedors be accepted. Cd.  
Moved by Mr. Santee that the

## CURLY KID K.O.'S YOUNG DORWOOD

Before a crowd that packed the new large Elks hall at Viking on Wednesday evening, Curly Kid Archibald conquered his knockout record by putting Young Dorwood of Innisfree to sleep in the fourth round of a scheduled ten round bout.

The first round was even but in the second it was plain to be seen that Dorwood wouldn't last long under the barrage of rights and lefts that landed with telling effect. In the third round Dorwood was knocked out of the ring twice and was saved by the bell. After a half minute of the fourth round, Curly caught Dorwood with a terrific right to the jaw and Dorwood took the count of ten.

Nash and Myers of Irma fought a furious six round draw with Nash having the better of the fight until the fourth when Myers made Nash miss with his right repeatedly, and piled up enough points to earn a draw. Both boys got a real hand from the crowd for their good work.

Other preliminaries were between Kid Miller and Red Martin, of Viking, and Young Sloane, and Todd of Innisfree, both of which were declared a draw.

Chas Sutter of Innisfree refereed the preliminaries, and Jack Coates of Vegreville refereed the main bout. Thumell of Viking, acted as announcer.

Quite a few Irma fans were in the crowd to see the boys in action. The Viking Elks are endeavoring to secure Curly Kid and Art Prudhine for a return match at Viking in about six weeks.

**FARMERS ADVISED TO SECURE SEED OATS EARLY**  
One of the most serious effects of the past dry season will be a shortage of good seed oats for next year's crop in some sections of the province. Farmers in these areas are being advised by the Department of Agriculture to lose no time in securing the seed supply they will require for spring.

There will be little difficulty in supplying this demand from other parts of the province where a heavier yield of the coarse grains was harvested, but it will be necessary to know the requirements of the drier districts at an early date. Already a considerable demand is reported from outside the province, and buyers are looking orders for a large quantity of seed oats to be shipped out of Alberta before next spring.

In order that Alberta farmers may be assured of their seed supply while grain of a good quality is available, they are advised to communicate at once with their local elevator agents, so that arrangements can be made for any necessary shipments before seedling time.

Weed Inspector got out on Weed Inspections only when ordered by the Council. Cd.

Moved by Mr. Fischer that the Secretary write the Department of Public Works to the effect that a rate payer of this Municipality has an objection to the leasing of the road allowance between Sec. 11 and 12-45-9-w4th at point of diversion on account of Water frontage on his land. Cd.

Moved by Mr. Santee that By-Law 27 Restraining animals at large in Division 5 pass its first reading. Cd.

Moved by Mr. Vesy that By-Law No. 27 pass its second reading. Cd.

Moved by Mr. Burton that By-Law No. 27 pass its third and final reading. Cd.

Moved by Mr. Fischer that Messrs. Smallwood and Vesy get advice in the matter of Sec. Grain and Relief indebtedness from a competent lawyer when in Edmonton attending the Municipal Convention. Cd.

Moved by Mr. Smallwood that the Secretary be instructed to write Mr. Reese by registered mail regarding his indebtedness to this Municipality on the part of N.E. 20-45-9-w4th asking him to pay same in full as per agreement, or to ask him for a quit claim deed. Cd.

Moved by Mr. Smallwood that the Secretary order a supply of all amendments to the Domestic Animal Act to date and supply all poundkeepers in this district with a copy. Cd.

Moved by Mr. Smallwood that this council adjourn. Cd.

## CHURCH NOTICES AND ACTIVITIES

**ANGELIC CHURCH NOTICE**  
His Lordship the Bishop of Edmonton will be in Wainwright Sunday, October 27th and possibly may visit Irma on the same date, so watch for future announcements.

The next W. A. meeting will be at the home of Mrs. C. Wilbraham on October 22nd. Everybody welcome.

**UNITED CHURCH NOTES**  
The services next Sunday will be held as follows:  
Ross School at 11 a.m.  
Alma Mater at 2 p.m.  
Roseberry at 3.30 P.M.  
Irma at 7.30 P.M.  
Sacrament will be held at Ross.  
Topic: "The Sixth Commandment or the Sacredness of Human Life."  
Prayer Service in the Church at 8 p.m. Friday evening.

**SUNNY BRAE SCHOOL REPORT MONTH OF SEPTEMBER**  
Grade VIII—Kathleen Knowles, average 76; Rena Fenton 62; Florence Bacon, 61.  
Grade V—Mary Miles 70.  
Grade III—Tom Bacon 74.  
Grade II—Albert Bacon 81.  
H. M. Congdon, Teacher

**NOTICE — To Coyote Hunters.**  
Parties destroying fences or trespassing on the following lands will be prosecuted: Section 9; N.W. 10; N.E. 17; all of 21 in Township 46 and Range 8; west of 11th—E. F. Darling, W. H. Morse, Yonker Bros., J. E. Coles, Owners.

The Village fathers have had the grade widened at the corner of Main Street and Third Avenue which added considerably to the appearance of the street at this corner.

**RIFLE STOLEN FROM IRMA RESULTS IN ARREST OF WHOLESALE THEFT GANG**  
Monday Magistrate P. C. H. Grimrose, in the provincial police court, Edmonton, sentenced part of the gang that had been arrested for breaking into the Imperial Lumber Co., office at Irma on the night of July 27th when among the loot obtained was a rifle and two shot guns belonging to Mr. Carl Finch, manager of the local office. Mr. Finch happened to have the number of the rifle which he gave to the police. The rifle had been disposed of to an innocent party who had taken it to an Edmonton gunsmith to be repaired when it was located by the police and the owner interviewed. This interview resulted in locating one of the largest gangs that the police have intercepted for some time. Several truckloads of stolen property taken from different parts of the province were located and most of the members of the gang are serving time ranging up to two and a half years. For the Irma job William Edward Stephens was given two and a half years at Prince Albert Penitentiary. Alex. Meers was given two years, while Albert Moreau, one of the youngest members of the gang was remanded for sentence.

**SALE OF IMPOUNDED ANIMALS**  
The following animals are to be sold on the N.E. 24-45-7-w4th on Saturday, 19th October at 9 o'clock:  
1 Black mare with silver mane and tail, white on face, weighs about 1250 lbs, no visible brand; 1 Chestnut mare, white face, white hind leg, little white on front foot, weighs about 1000 lbs not branded; 1 Bay Gelding, (young colt) little white on hind leg, weighs about 800 lbs, not branded; 1 Bay mare, white star on face, two white hind feet, weighs about 1300 lbs, no brand; 1 Bay Mare, little white on face, weighs about 1150 lbs not branded; 1 Bay Gelding, white star on face, shod on front feet, weighs about 900 lbs, no brand; 1 Black Mare, white narrow strip on face, weighs about 1300 lbs, not branded; 1 Bay Gelding, little star on face, two white hind feet, white mark on left side, scar on right front foot, weighs about 1200 lbs, not branded.  
1 Bay Mare with reverse heart, bar over on left shoulder.  
O. Croteau, Poundkeeper

## HOLD UP ARTIST GETS MOVIE CASH

(From The Viking News)  
A lone bandit held up the Viking movies last Friday evening and got away with the receipts amounting to about \$50.00 including \$20.00 change.

Young Rodney Metcalf, got the surprise of his young life when the bandit opened the outer door of the hall and quietly but firmly ordered him to turn over the cash which was in a bag.

The hold up man waited for his chance until the show was well on, and no one in the lobby except Rodney, as Mrs. Metcalf and Mrs. Collins who were at the wicket previous to this, had gone into the main hall to see the show.

The bandit quickly made his exit, and was seen to hurry to a car parked near the hotel, and it is supposed he had an accomplice waiting for him. The car started north in a cloud of dust and was soon out of sight.

Const. Miller who was in the hall at the time was notified of the robbery, and after getting the facts, in company with policeman Sheets, and Steve Jones, made a fast run to catch the burglar, and went as far as Vegreville without any success.

The hold up man is described as about thirty years of age, dressed in grey suit, wore no mask, medium height, and packed an automatic revolver, blue steel barrel.

Police headquarters in all nearby towns and cities were immediately notified and a sharp look out kept but up to time of going to press, the yegg is still at large.

The robbery occasioned no excitement among the crowd in the hall and the show carried on as usual. Well No. 18 was brought in on Monday with a flow of \$3,500.00 feet per day, by the drillers for the Northwestern Utilities. Company officials and geologists and several local citizens were present.

The flow from this well will be added to the number now giving gas supply to Edmonton and intermediate towns.

**Wedding Bells**  
**NEWBERRY CARTIER**  
A quiet wedding was solemnized on Monday, October 14th at the manse at Mannville, when Rev. A. B. Godden united in marriage Miss Celina Cartier of Fabyan, and George J. Newberry of Irma. After the ceremony the happy couple left by motor for Edmonton.

Mr. Newberry is a nephew of Mr. and Mrs. A. Dennis of Minburn.

**NOTICE**  
There will be a series of Pictures on health and hygiene, held in the United Church at 2.30 P.M. Friday, October 18th. Held under the auspices of the Irma Women's Institute, and will be for Women and girls over 16 years only. It will be free of charge.

**SALE AND REDEMPTION OF IMPOUNDED ANIMALS (Sec. 48)**  
Notice is hereby given under Section 48 of The Domestic Animals Act (Municipalities) that 1 Grey Gelding about 13 years old, no visible brand, weight 1400 lbs, was impounded in the pound kept by R. Heaton, located on the S. E. 32-45-7-w4th on Wednesday, the 18th day of September, A.D. 1929, and that the animal was sold on the 3rd day of October, 1929, to John Heaton of Fabyan.

—And that said animal may be redeemed by the owner or on his behalf within a period of thirty days from the publication of this notice in The Alberta Gazette, upon payment of all fees and costs due to the municipality and the purchaser of said animal.

For information apply to the undersigned.  
R. J. TATE, Sec.-Treas. of the Municipality of Battle River No. 423.  
Post Office, Irma, Alta.

**KIEFER'S SHOWS**  
**HARDISTY**  
**Irma Coupon**  
This Coupon and 7-1-2 "c" tax when accompanied by Two Paid Adult Admissions will admit 1 Adult from Irma District to the "Donovan Affair"

## NEWS ITEMS FROM JARROW

**OBITUARY**  
This community has been greatly shocked during the last few days by the death of two old timers of the district while both have been suffering for some time from lingering illnesses, yet death coming to both so close together has touched the community very deeply and the sympathy of all friends and neighbors go out to the bereaved families.

In the early morning of October 10 there passed away in Lamont hospital Mr. H. S. Dennison at the age of fifty-two. Mr. Dennison came here 23 years ago from the United States and has lived north of town ever since. He has always taken an active part in the life of the district in which he lived and will be greatly missed by friends and neighbors in that locality. He was chairman of the Batts school board at the time of his death. Mr. Dennison had not been very well for some time and while visiting his daughter in Vermilion about the 1st of August he became seriously ill and was rushed to Lamont hospital where it was found he was suffering from paralytic stroke. All that could be done was done for him but he passed away on Thursday last. He leaves to mourn his loss, his wife, two daughters, Mrs. Archibald of Irma and Mrs. Friedlands of Vermilion and two sons, Ezra farming near Jarrow, and Carl at home. The funeral services were held in the United Church Friday afternoon at 2 o'clock. A large crowd turned out to pay their last respects to a good friend and neighbor and show their sympathy to the sorrowing family. Floral offerings were received from the Jarrow Community, wife and family, Mr. and Mrs. Ezra Dennison, Mr. and Mrs. Lindberg, and the Batts District.

On Friday, October 11th there passed away at her home in Jarrow, Mrs. Margaret Lockhart. She had been suffering for some time from cancer in the throat and for several weeks was a patient in Viking hospital. She was brought home about a month ago where she passed away.

Mrs. Lockhart was born in Colburg, Ont., seventy eight years ago, but lived the greater part of her life in Twin City, Mich. In 1918 she came to Jarrow where she kept house for her sons, on the farm, later moving to town where she continued to keep house for her son Thomas. She was able to do all her own housework until this summer when she developed the illness that later caused her death. Mrs. Lockhart was beloved by all who knew her and her beautiful patience and unflinching courage and sweetness during her last illness will be remembered by all who visited her, and who were fortunate enough to be numbered among her friends. She leaves to mourn her loss, 8 children, Mr. Mott Lockhart of Edson, James of Smith Port, Penn., Will and Tom of Jarrow, and Mrs. Matt McColl of Hayer, Mrs. W. Anderson, Mich., Mrs. Beelo, Twin Lake, Mich., and Mrs. B. McColl of Lucknow, Ont.

The funeral was held from the United Church on Sunday afternoon at three o'clock. Flowers were received from the family, Jarrow Community, Jarrow Ladies Aid, Mr. and Mrs. Orr, Mr. and Mrs. Snyder.

On Monday evening, October 7th the annual meeting and election of officers at the Jarrow Community Club was held. The results of the membership drive showed Mrs. Barton's side winning by twenty five new members. A full report of the year's work was read by secretary and a financial statement by the treasurer. The different committees read reports of the year's work. The officers elected for this year are Mr. H. Symonds, President, Mrs. Miller, vice-president, Mrs. Laxton, Sec., Mr. Miller Treas., Messrs. W. Boyd, B. Yakes and A. McGregor were the board of directors. Appointed Mr. N. Laxton as manager of the hall and K. Marby as caretaker. The meetings of the club will be held on second and fourth Tuesdays of each month for this year instead of first and third Monday as formerly.

Quite a number from here attended the dance in Kinross on Friday evening and all report a good time. Mr. P. Lindquist left for Viking on Monday to work in the flour mill.

On Saturday afternoon a meeting of the ratepayers of the school was held to appoint a trustee to fill the vacancy caused by Mr. Fisher's removal from town. Mr. Miller was elected as trustee.

The entertainment committee of the Community Club met at the home of Mr. and Mrs. Miller on Monday evening of this week and planned several entertainments for the hall fund. A dance on Friday night was arranged and a card party for Oct. 29th. A series of card parties will be held one each month through the winter and a grand prize given in March to the winner of the highest number of points during the winter. A play will be put on about December 1st and practices will start next week.

Markets For Western Products

The story of the marketing of the grain of the western provinces of Canada is a long and colorful one, but exceedingly interesting one. It is a record of one acute problem arising in succession to another as the years passed and conditions both at home and abroad brought about radical but inevitable changes. It is a history allied with heroic efforts, the breaking new trails, the grappling with the seemingly impossible, in the endeavor to solve first one problem and then another, thus removing the difficulties that lay in the path to successful, prosperous, western agriculture.

Twenty-five or thirty years ago the chief cause of complaint was the then existing elevator combine, closely linked with the transportation companies. The passage of the original Canada Grain Act, with its provision of the leading platform, went a long way towards the removal of that grievance.

Then, with rapid increase in settlement and consequent production in the early years of the present century, lack of railway facilities resulting in annually recurring blockades, caused enormous loss to the producers. The great era of railway building largely solved that problem.

The elevator problem, involving questions of grading, dockage, charges for services rendered, depressing of prices, etc., still remained acute. The result was the inauguration of Government-owned and operated elevators in some provinces and farmers' co-operative elevators in Saskatchewan, the creation of the United Grain Growers, and constant revision and amendment of the Canada Grain Act.

Following the war, and the enormous increase in acreage brought under cultivation by the Greater Production campaigns, coupled with the complete demoralization of world trade, falling prices, and lack of credit and buying power in Europe, and, in particular, the abandonment of the war-time Wheat Board, western grain growers found themselves in a serious predicament, faced with prices barely equivalent to, even below, the cost of production. With courage and unsurpassed initiative western farmers grappled with the problem and worked out their own salvation through the organization of their Great Wheat Pools.

Conditions improved, marketing became more scientific, prices somewhat more stabilized. Then came the crop of 1928, the largest in volume in the history of the west, but, owing to climatic conditions, one of poor quality. Within two years, too, the "combine" and the motor truck had come very largely into use, with the result that the grain poured into the elevators not only in unprecedented volume, but with unprecedented rapidity. The building of good market roads likewise served to speed up deliveries.

The net result was a situation which, while providing employment to a huge army of harvesters, and an enormous volume of traffic for the transportation companies, left little margin of profit for the grower of the grain. Complaint was almost universal against the Board of Grain Commissioners, it being very generally felt that it was " asleep at the switch," and had not made even reasonable efforts to cope with the situation which had developed. The old Board was replaced by a new one which has the confidence of the farmers and from which better things are expected.

Beneficial as the operations of the Pools have been, there has been developed in some quarters, and notably in Saskatchewan, a feeling that the maximum benefits to be derived from united selling cannot be realized until every bushel of wheat grown in Canada is marketed through one agency, namely, the Pools, and that human nature being what it is, this cannot be secured through wholly voluntary efforts, and consequently the minority should be compelled by legislation to throw in their lot with the majority and make its delivery their wheat to the Pools.

While this agitation is being carried on, a new situation has developed. Owing to a large carry over from the 1928 crop, and the rapid harvesting and delivery to the elevators of this year's crop, and with a manifest reluctance on the part of European buyers to purchase Canadian wheat at a price commensurate with its value and production cost, there is practically no movement of grain out of Canada at the present time. The result is that all forms of storage in this country are, at the time of writing, almost filled up, and embarking on shipments in effect.

The situation is believed to be only a temporary one, and that, as soon as other wheat exporting countries, now selling below the price which Canada demands, are out of the market, there will be a call for Canadian wheat and a price obtainable acceptable to the Canadian producer.

However, with the steadily increasing size of the Canadian wheat crop, and increases in other countries as well, western farmers must inevitably take a keener interest than ever before in the whole subject of finding and developing export markets for Canadian products. The possibilities of the awakening Orient call for close investigation and expert study. Such subjects as the effect of Canada's Government-owned merchant marine, operated at a loss, in opening and developing new markets require careful consideration as to whether the direct operating loss is not more than offset in national gains and profit through the development of export trade.

Western farmers as never before will find it necessary in their own interests to devote attention through the medium of their organizations to world problems and conditions, the trend of economics, and the effect which machinery and new channels of transportation must assuredly have upon world food production, distribution and prices.

The orange industry is one of the largest users of trade marking machines.

## Indigestion

What most people call indigestion is usually excess acid in the stomach. The food has soured. The instant remedy is an alkali which neutralizes acids. Buy, don't use, acids. Use what your doctor would advise.

The best help is Phillips' Milk of Magnesia. For 50 years since its invention it has remained standard with physicians. You will find nothing else so quick in its effect, so harmless, so efficient.

One tasteless spoonful in water neutralizes many times its volume in acid. The results are immediate, with no bad after-effects. Once you learn this fact, you will never deal with excess acid in the crude ways. Go learn—now—why this method is supreme.

Be sure to get the genuine Phillips' Milk of Magnesia prescribed by physicians for 50 years in correcting excess acids. Each bottle contains full directions—any druggist.

### London Suffers From Drought

According to Records, Condition worst in Seventy-One Years

London is experiencing the worst drought on record in 71 years, a 32-day lack of substantial rainfall eclipsing the dry period of the summer. The Lea River, supplying a considerable area of eastern and northeastern London, is beginning to fall, causing acute anxiety.

Garden watering from hoses or outside taps was stopped by the authorities several months ago and the special assessment levied for this service will be reduced by half at the next date of payment, the water board promises.

### ST. VITUS DANCE

A Disease Of The Nerves Which Must Be Treated Through the Blood

St. Vitus Dance is a disease of the nerves brought on by a morbid condition of the blood. It is a common disease with children, but sometimes attacks adults. The treatment of this trouble to be successful is through the blood, because rich, red blood is the life of the nerves.

In this way Dr. Williams' Pink Pills have proved beneficial in even the most severe forms of this trouble, because they enrich the blood supply, thus carrying the necessary food to the nerves. In proof of the value of Dr. Williams' Pink Pills in cases of this kind we have the statement of Mrs. William Stead, Winton, Ont., who says: "My eldest girl at the age of nine years suffered from an attack of whooping cough which left her very weak, and finally developed into a severe attack of St. Vitus Dance. She was under a doctor's care, but with no beneficial results. We also tried other treatment, but with no better results. To make matters worse, she was taken down with measles. Again the doctor was called in, as she became so weak, and her limbs so tremble that we had to take her about in a little hand wagon. I thought a change of air and some might help her, so we sent her by boat to Port McNicoll, a distance of about a hundred miles. She seemed to improve while there, but as soon as she came home her strength was gone again. I took her to another doctor, but with no better results. I was distressed to see how helpless she was becoming, so decided to give Dr. Williams' Pink Pills for Pale People. To my surprise she did not even try to do for about eighteen months. She walks to and from school, a distance of about a mile, which of course is proof of her present good health. I have much to praise Dr. Williams' Pink Pills for Pale People. I recommend them in all cases of weakness."

You can get these pills from any medicine dealer or mail order box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Going To Brandon

Dr. Buckley Is New Agrostologist At Dominion Experimental Farm

Dr. G. F. H. Buckley has recently been appointed to the position of agrostologist at the Dominion Experimental Farm, Brandon. Dr. Buckley was born in Halifax, N.S. He received his B.S. degree from the University of Alberta in 1920. On his return to Edmonton he became assistant professor of field husbandry, having special charge of the field experimentation. At the Brandon farm Dr. Buckley will continue the corn breeding investigations which were commenced in 1925. This work is being carried on with a view to developing a cold-resistant, early maturing variety of corn that will give good yields for fodder and silage.

Sleep is the great nourisher of infants, and without peaceful sleep the child will not thrive. This cannot be got if the infant be troubled with worms. Miller's Worm Powders will destroy worms and drive them from the system, and afterwards the child's rest will be undisturbed. The powders cannot injure the most delicate baby, and there is nothing so effective for restoring the health of a worm-worm infant.

### Only One Bachelor King

England has had only one king who grew to manhood and who never married. That was William Rufus, or William II, son and successor of William the Conqueror. Edward V. and Edward IV. were never married, but they died before they reached their majority.

### Minard's Liniment For Neuritis

Use Of Combines

More Reaper-threshers combines have been in operation in the Brandon district this year than ever before, despite short grain crops.

Eighteen years were required to make huge fates of Henry VIII's Chapel in Westminster Abbey.

### History In Narrative

"Pages From Canada's Story" Of Particular Interest To Pupils In Western Schools

"Pages From Canada's Story," by Helen Palk, is bound to be a considerable aid to students of history, particularly to those in our public schools round the age of eleven. Homeopaths claim that their formula and method of taking medicine is more advantageous to patients than the prescriptions of allopathists, and Miss Palk can certainly claim that placing before pupils of schools, in Canada, outstanding events in the history of Canada in narrative form will create a more lasting impression upon their minds.

A great Frenchman, Rousseau, stated that "the book which, to my thinking is the happiest treatise on natural education is 'Robinson Crusoe,'" and it is apparent that the author of this little book realized that children will absorb those incidents connected with the vital events of our country's history, simple portrayals of character, and graphic descriptions of locations, more easily than a precise chronology of events, wearisome through sameness, tedious in its attempts at analysis and redundancy of phraseology.

In these word pictures, the authoress has successfully endeavored to place the essential facts clearly before the eyes of the reader, which instantly photographs them upon the mind, thus aiding the memorizing of them.

Extreme care has been taken in choosing the most vital and colorful events which appeal to the imagination of the child, and this without diverging from the truth, but as it has been written particularly in the interest of pupils in Western schools the story of Western development receives more descriptiveness.

The authoress has studiously avoided redundancy of phrasing, the use of hard words, and verbosity, all of which will be to the benefit of the children for whom it is written. It is not written for the historian or erudite person as is readily seen from the sketchy character of constitutional changes.

Its main educative feature lays in the vivid descriptions of early pioneer life. The dangers, struggles and tragedies of the pioneers who laid the foundation of this great nation, which cannot be too emphasized, as we are all prone to ignore the sacrifices and terrible experience of those who "built better than they were of."

To forget that but for their supreme daring, patient endurance and superb courage the conditions which prevail today, to say nothing of the retention of the country, would not have been attained.

Miss Palk has produced something better than a text book. She has produced a record of outstanding events, which will inevitably appeal to the scholars in our schools and prove both an incentive and fundamental ground for a more exhaustive study of Canadian history, and after all the greatest principle in education is to credit a desire for knowledge, to rear the tender thought and pour fresh instruction upon the mind.

The avoidance of dates and tedious details is more of an advantage than otherwise. By taking periods instead of years, the authoress has been able to fix the main features of transpiring events and the chief characteristics of the participants in them more surely in the minds of children. By so doing she has reached the happy height of appealing to the sympathy and understanding of her readers, which of necessity must fill them with pride of ancestral triumphs and achievement, and incidentally a glow of patriotism. Who shall say that some of the children for whom the book is written may not be stung with some thought whose splendour may impel them to prove as great, if not more heroic, than those characters whom the authoress has depicted with a sure pen and clarity of insight.

Great thought and intense feeling come like instincts unawares to those who rise above mediocrity. Yes, certainly Miss Palk has given to the schools something more than a few pages from Canadian history, something more than a text book, a compilation of the most inspiring incidents in Canada's annals, vivid character sketches which impregnate themselves upon the youthful mind, and best of all a well spring from which her readers can draw inspiration.

The book is splendidly illustrated, and as pictures pot only have a great appeal to the young, but are longest remembered; they will materially help forward the objective of the authoress.

Contrary to a popular belief, automobile tires wear better in cold weather than in hot.

### Delegation Sails For Japan

Party Has Gone To Tokyo For Preliminary Conference

Just what will come up at the chief subject for consideration at the forthcoming meeting of the Institute of Pacific Relations at Kyoto, Japan, cannot be known until preliminary discussions are held, said Lord Hailsham, on his arrival at Ottawa. Lord Hailsham heads the British delegation, several members of which spent a few days as guests of Their Excellencies the Governor-General and Lady Willingdon, before proceeding west to Vancouver. They sailed for Japan on October 3.

### Cramps Diarrhoea Pains in Stomach

Mr. Roy Lighthall, Milford, Ont., writes: "I became very ill, lost my appetite, had cramps, diarrhoea, and severe pains in my stomach."

"I purchased a bottle of Dr. Fowler's Wild Strawberry and before I had taken half of it I was completely relieved, and have had no symptoms of the trouble since."

"I cannot praise 'The Extract' too highly, and will never be without a bottle of it in the house."

"It is pleasant to take and acts very quickly."

"My brother had the same experience with it as I had."

"Dr. Fowler's has been on the market for the past 84 years; you don't experiment when you buy it. Price 50 cents a bottle at all dealers; put only by The T. Millburn Co., Ltd., Toronto, Ont."

### Woman Aviator Killed

Miss Josephine Callahan, an armless woman flyer, was killed when an unlicensed plane she was piloting crashed in a cotton field near Abilene, Texas. Miss Callahan, said to have been armless since birth, had a special arrangement on the control stick for handling the plane with artificial arms.

Good-bye Asthma. Persons suffering from this extremely trying trouble known as asthma know what it is to long with all their hearts for escape from a tyrant. Never do they know when an attack may come and they know that to struggle unaided is vain. With Dr. J. D. Kellogg's Asthma Remedy at hand, however, they can say good-bye to their enemy and enjoy life again. It helps at once.

Religion makes a mighty poor shroud after it has been worn as a cloak.

One kind of enemy is a friend who does not oppose you when you are wrong.

## The right way to redye Finest Silks

TEXTILE manufacturers always use special dyes for silk or wool. They know that is the only way to secure the most perfect results. The makers of Diamond Dyes are the first to enable home users to follow this plan.

Next time you want to dye some of your more valuable articles of pure silk or wool, try the special Diamond Dyes. They will give you the most brilliant colors, with greater depth and permanence than any "purple" dyes.

These special Diamond Dyes are just as easy to use as ordinary dyes. Like the white package Diamond Dyes, they contain the highest quality aniline dyes money can buy. That's what makes them go so smoothly and evenly, without spotting or streaking. The secret of their brilliance, their resistance to sunlight, wear, and washing.

The white package of Diamond Dyes is the highest quality dye prepared for general use. It will dye, or tint, silk, wool, cotton, linen, rayon (artificial silk), or any mixture of materials. The blue package is a special dye for silk or wool only—when you can dye your valuable articles of pure silk or wool with results equal to the finest professional work. When you buy—remember!—the white package dye silk or wool only. The white package will dye every kind of goods, including silk or wool. Your dealer has both packages.

**Diamond Dyes**  
Sun Proof  
EASY TO USE—BETTER RESULTS

Diamond Dyes contain the highest quality aniline dyes ever used. And it is the life of that count. They are the life of color, brilliance and permanence. ALL DEALERS 15¢

## World's Grain Exhibition To Be Outstanding Event In The History Of Canada

The World's Grain Exhibition and conference to be held in Regina in 1932 promises to be the greatest international event ever staged in the Dominion of Canada. Invitations are being given world-wide distribution, and it is anticipated between fifty and sixty countries will be represented.

The year, 1932 also marks the fiftieth anniversary of the settling of that part of the prairies which now constitutes Saskatchewan, which makes it a fitting time to hold such a world-wide event.

The Federal Minister of Agriculture, Hon. W. R. Motherwell, is chairman of the general committee, and through his good offices the Federal Government at its last session voted an initial grant of \$1,000,000 in order to allow the committee to proceed with the preliminary work. This is being directed by J. A. Mooney, the manager, and D. T. McKelvin, the secretary. The temporary services have also been secured of Ernest Rhodes of the Federal Department of Agriculture, at Ottawa, whose experience as secretary of the World's Foultry Congress held at Ottawa, in 1927, will be extremely valuable in getting this new world event off to a good start.

Steps are now being taken to prepare an announcement and prize list for world-wide distribution. This publication will be unique in that it will contain a list of the most valuable prizes ever offered for any agricultural products. One example of this is the class for hard red spring wheat which carries a first prize of \$25,000 and fifty other prizes ranging down to fifty dollars. Total prizes will amount well over \$200,000.

Included in the competitive classes are wheat, oats, barley, corn, rye, buckwheat, rice, millet, field peas, field beans, and the seed of flax, hemp, alfalfa or lucerne, red, alaska, sweet and white Dutch clover; the grasses, timothy, bromine, red top, bent, Kentucky blue, Canadian blue, the Fescues and the Agropyron species; sunflower, field roots and garden vegetable seeds.

Such a prize list provides classes for every province in the Dominion and for a great many other countries.

The competitive classes, international, national and provincial educational exhibits, and commercial displays may be termed the spectacular side of the event. There is the other side from which Canada hopes to gain much, and that is the conference.

Thousands of research workers along grain and seed lines are busy in all parts of the world attempting to solve the problems incidental to the production and marketing of these products. In 1932 Canada will be the mecca for these experts, and the farmer will be able to hear and question these men, and it is hoped learn the solution of many of the problems with which he is now confronted. Everything will be discussed from soils to markets, plant disease and insect pests, and farm machinery.

Grain from this year's crop may be the winning entry, and it behooves the grower and prospective exhibitor to commence his selecting at once. The selection for seed for the 1930 and 1931 crop is also a point which growers would do well to keep before them, with the possibility of entries in the World's Grain Exhibition always in view.

**White Blackberries**  
A Georgia gardener two years ago, found a white blackberry bush in the woods. He took a cutting from it and succeeded in cultivating white blackberries, the latest horticultural freak. The white berry tastes the same as the black, but it has not yet been determined whether the bushes will be fertile.

Eighty sled dogs were taken by Commander Byrd on his Antarctic expedition.

### Increases Egg Production

Experiments Show Advantage Of Open Windows In Poultry House

Experiments at the University of Wisconsin show that the opening of the windows of the poultry house is nearly as effective as exposing hens to the ultra-violet rays of a quartz mercury lamp or feeding them cod-liver oil. The tests were supervised by E. B. Hart and J. G. Halpin, heads of the Agricultural Chemistry and Poultry Husbandry Departments, respectively.

Eight pens of pullets, consisting of 35 birds each, were used to compare different methods of keeping the flock from October to the end of April. A total of 2,337 eggs was laid during the seven-month period by the pullets kept in houses where the windows were open. The production was raised to 3,281 eggs when the birds were treated daily with the quartz mercury lamp. A third pen which was both fridolized and exposed to the sun made the highest record, its production being 3,269 eggs.

### Sage Brush As Feed

Those Of Western Plains Superior To Many Of The Grasses

Analyses made by the Dominion Chemist at Ottawa, show that a number of the sage bushes of the western plains possess fair percentages of protein, especially in the younger plants. In this respect they are superior to many of the grasses. According to authorities, many species of sage brush are forage plants of considerable value, especially for sheep. One author states "whole bands of sheep will leave all other forage and feed on sage-brush for a day or two at a time; after that they may not touch it for days or even weeks."

MILITARY CAPE COAT  
The cape theme so smart in grown-up styles has entered the junior mode in military cape coat. Illustrated in navy blue homespun it is quite the most fashionable and practical idea of the moment for girls of 8, 10, 12 and 14 years. The turn-over military collar is joined to a band that fits snugly about the neck. A huge brass button at neck and one at waistline holds the garment closed, and adds decorative note. A stitched belt defines waistline. Style No. 604 is made at big saving. In the 8-year size, to copy it exactly, it takes but 2 yards of 54-inch material with 2 1/2 yards of 35-inch lining. Lacquer-red suede finished woolen, trend in reddish-brown tones, bottle green velvet, almond green wool velvet, and brown and beige checked woolen are ultra-new and chic for this attractive cape coat. Pattern price 25 cents in stamps or coin (coin is preferred). Wrap coat carefully.

### Canadian Eggs Enjoy Excellent Reputation Imports For Britain Have To Bear Identification Mark

Canadian eggs have earned a fine reputation in the Mother Country as a result of the care that is taken in their production and in the grading and methods of marketing. From now on they will be required to meet a keener scrutiny in the British market. In accordance with a new regulation put in force by the British Government, all imported eggs have to bear an identification mark placed on each individual egg. Mr. W. A. Wilson, the agricultural products representative for Canada, in Great Britain, has expressed his view of Canada's prospects under the new regulations that have been introduced by the Merchandise Marks Act and the Grading and Marking Act, recently put into force. These measures require that all imported eggs be individually marked for identification with ink. In the month of August, Mr. Wilson writes, home produced eggs which were untamped were particularly in demand in price range from two to ten shillings per long hundred more than stamped fresh eggs from any country. This he says is a direct outcome of the new "marking" laws, which has enabled consumers to know what they are buying. The production of fresh eggs in England, however, has but a limited season. When these no longer meet the demand, Mr. Wilson is quite hopeful that such Canadian fresh eggs as are available will find a ready demand on account of their known good quality. The present time, however, Mr. Wilson regards as one when producers, dealers and exporters should exercise their utmost care so as to ensure that the eggs go forward only in the freshest condition possible.

### Wanderlust Of The Birds

Explanation Of Their Migrations Seems To Be Impossible

We call ours a restless age among men; but even Lindbergh is a stable stay-at-home compared to some of the birds. And no one has yet satisfactorily explained the phenomenon of these migrations of millions. Why do the terns that nest in the Arctic fly to the Antarctic, and not vice versa? Why do most of the birds of the Northern Hemisphere make to these long, annual treks, while the phenomenon is so uncommon in the Southern? What makes the birds so restless long before the cold weather comes and the food supply gives out? Is it some strange, inherited preglacial memory? That is a hypothesis, but it only suggests another mystery: for how explain such memories in birds, and not in the king of the beasts, man?

### Mission Of A Newspaper

Is To Publish What Intelligent Readers Will Enjoy

"A newspaper's highest mission," said Louis I. Jaffe, editor of the Virginian-Pilot, in addressing the Institute of Public Affairs, in Charlottesville, Va., "is not to give the public what is relished and smirked over by readers of lowest mentality, but rather to present what is enjoyed and welcomed by readers of more than average intelligence and discrimination." It can hardly be denied that a general adoption of this ideal would lift the thought of newspaper readers to a higher level.

Mistress: "But why should you wish to leave after being in my service for 45 years?"  
Maid: "Well, ma'am, I don't want to get into a rut."

### Honor Canadian Pacific Men

Life-saving certificates of the Royal Canadian Humane Society were recently presented at Port McNicoll by Hon. Wm. Finlayson, Ontario Minister of Lands and Forests, to Car Inspector Alex. McCullough, No. 1, Constable Harry Glyves, No. 2, and Chief Clerk J. A. Davidson, No. 3, all Canadian Pacific employees stationed at Port McNicoll, who last March rescued from drowning Mrs. Gaudrault, her 3-year-old daughter and Margaret Swales, who were crossing the lake from Victoria Harbor to Port McNicoll, when the ice gave way. In making the presentations Mr. Finlayson stressed the point that railroad men were at all times cool and collected at a crisis.

### Another Titled Rancher

Former Russian Prince Is Raising Musk-rats In Alberta

Alberta has added one more to her list of titled ranchers. This time it is a Russian prince, remotely related to the defunct royal family through an alliance in the days of Peter the Great, but of recent years more or less a wanderer on the face of the earth in a search for a happy home. Prince Bolshovik ceased from troubling and princelings are at rest.

Prince Leo Gallitzin, twenty-five years old and married just about a year, is this latest royal rancher. He has bought over 400 acres of land on the McLeod River, five miles south of Edson, right in the heart of the big game country, and there he is going to raise muskrats! On the land there is a lake, which covers 150 acres, and this is to be the habitat of the colony of muskrats the prince plans to develop. There are already a few hundred furry rodents on the place, but a much larger number will have to be produced to make the ranch a paying proposition. The lake is to be enclosed with three miles of wire fencing at a cost of \$2,000.

Much of the farm work is to be done by the prince himself, though he will have a manager and a few helpers. He has studied fur farming intensively and has a number of theories that he intends to put to the test of practice, these having been endorsed by the professors of agriculture of Louvain University, where he studied for some years. It is not expected, however, that the rat ranch will pay dividends until about 1932.

### Airplane Shipments Comprise Many Things

Great Banking Firms Use Service For Sending Bullion

Even crooks are finding the aeroplane useful. An amazing case of gambling gamblers, for use at Deauville, being smuggled by aeroplane into France recently came to light. The machines were made in England, and it is alleged that they were taken to France by an English airman, who smuggled them through the Customs at Le Bourget, and sent them to Deauville by motor cars. Perhaps the most striking of all tributes to the business value and dependability of the aeroplane is to be found in the fact that great banking firms now send cargoes of bullion by air almost every day. The "bullion aeroplane" with its precious cargo in charge of an armed guard, is an established feature air traffic.

A man has been sent as cargo in a goods aeroplane. Missing the last passenger machine, he noticed a cargo plane ready for flight. The goods were labelled with the name of the town to which he wished to go, so he had, himself, packed up and labelled and put in with the best of the cargo. The aeroplane reached its destination, and the man, having paid the freight charges on himself, was duly delivered.

### Solves Rent Problem

Andrew Boltz, 28, has solved the housing and rent problem. After working all day at the new \$4,000,000 breaker which he is helping to erect for the Philadelphia and Reading Coal and Iron Company, at Locust Summit, Boltz climbs up a ladder to a tarpaulin which he has suspended by 20-foot ropes from the limbs of two tall trees. When he crawls in, the weight of his body pulls the tarpaulin shut at the top, making his bunk weather-proof.

Ants detect enemies and identify friends by the sense of smell, experiments show.

## Growth Of Juvenile Immigration From Britain Is Satisfactory To Colonization Officials

### Nothing To Criticize

Conditions In Peace River Country Are Good Says Hon. Geo. Hoadley

No country has ever been pioneered where medical, surgical, nursing and other social services have followed the wake of settlement with such rapidity as in the so-called Peace River country.

Such was the statement made by Hon. George Hoadley, Minister of Health in the Provincial Government, when his attention was drawn to a press despatch from Montreal in which Hon. Evan Morgan, son and heir of the Earl of Tredegar, was quoted as stating the north country was not yet ripe for Anglo-Saxon settlers, "owing to the lack of amenities, especially surgical and medical." He was a member of the Chamber of Commerce party that recently visited the north.

"I think it is extremely unfortunate that statements such as are attributed to Hon. Evan Morgan should have been made," said the minister. "During the past few years, numerous men have travelled throughout the Peace River area, whose lives on the North American continent have made them familiar with conditions incidental to a pioneer settlement, who, without hesitation, have expressed themselves as being astonished at the admirable conditions that exist in the Peace River area from the standpoint of transportation and social services, having regard to the brief period that has elapsed since the beginning of settlement."

"In regard to the statement attributed to Hon. Evan Morgan that it is not fit for settlement of the Anglo-Saxons, may I draw his attention to the fact that numerous areas throughout the world have been pioneered successfully by them under more onerous conditions than exist in the Peace River area," said Hon. Mr. Hoadley.

"May I draw the attention of this gentleman, and the public generally, to the fact that no country has ever been pioneered where medical, surgical, nursing and other social services have followed the wake of settlement with such rapidity as in the so-called Peace River country."

### Results Of Tree Planting

Success Of Work On Prairies Is Very Apparent

Advent of a dry season this year calls fresh attention to the work being done by the Forest Service of the Department of the Interior, in distributing free trees to prairie farmers. Approximately 8,000,000 seedlings and cuttings are now being sent out annually, and travellers in the western provinces can see for themselves the success of the work. Not all or nearly all of the annual distribution results in actual forestation. But a good percentage of the seedlings, when carefully planted and tended, grow into trees which not only beautify the plains but serve also a most useful purpose. Forests have the effect of moderately reducing the temperature of air and soil, and render the climate more equable. They increase the humidity of the air and reduce evaporation. They tend to increase precipitation of moisture, though this tendency is not great on the plains. They help to regulate water supply, making stream flows more continuous. They also provide shelter for man and beast alike, a consideration not to be neglected on the windy prairies.

This is not to say that the widespread planting of trees will abolish all fears of prairie drought. But trees will do a little towards increasing rainfall, and will do much towards conserving moisture in the soil. For this reason, quite apart from aesthetic grounds, the government must be congratulated on its work, and the farmers encouraged to avail themselves of the free service offered—Manitoba Free Press.

### Just A Century Ago

Sir Henry Hawkins, later Baron Brampton, relates in his "Reminiscences" how as a small boy he once saw the corpse of a boy no older than himself borne by on a farm wagon. This boy had been hanged for robbing an orchard. In 1833 a boy of nine, so "George Godwin writes in 'The Future of Crime' was sentenced to death at the Old Bailey for stealing two-pennyworth of paint; the sentence was executed.

He who knows only his own side of the case, knows little of that

Plans for considerably increasing the flow of suitable British settlers to Canada were discussed at the annual conference of officials of the Colonization Department of the Canadian National Railways, which was held at the headquarters offices in Montreal, recently.

The chief matter under discussion at the conference is British immigration. Satisfaction was expressed at the considerable increase shown in this class of settlement this year over the previous season, and plans were discussed which are calculated not only to bring out a greater number of Britishers suitable for land settlement, but also to improve still further the conditions under which they are being settled.

Dr. Black reported having had an interesting conference with Rt. Hon. J. H. Thomas, during his visit to Montreal. The growth of juvenile immigration from Britain and the manner in which the young lads who have come out to farms are making good, was one of the matters furnishing considerable satisfaction at the conference. R. M. Pym, superintendent of juvenile immigration for the railways, reported that, since arriving in Canada, he had been able to visit some of the boys who had come out this year and was greatly pleased at the progress they were making and with the good class of homes on which the boys were placed. He had been impressed with the work such organizations as the Rotary Clubs were doing in taking a brotherly interest in the British boys who have been placed on farms.

### Advices Zones For Campers

Superintendent Of Prince Albert National Park, Would Please All Types

J. A. Wood, superintendent of Prince Albert National Park, speaking before the Board of Trade Executive, at Saskatoon, advised dividing of the park into zones in an endeavor to please all types of campers.

In the southern areas, containing Lake Waskesiu, he would have grounds suitable for cottages and tents for those who desire conveniences of many descriptions and have a distaste for tenting.

In a central area there would be ground for "semi-campers." These would provide tenting accommodation but include modern conveniences.

For those who prefer real camping, canoe trips and portages, the northern area would be reserved. Those who used this section would be what Mr. Wood termed "100 per cent. campers."

He believed the area unique in that within its boundaries was a tabularland which was really in the centre of the province.

Fish were in abundance and during the commercial fishing years of 1920 to 1926, the annual official catch amounted to about 60,000 pounds. To this could be added at least 25 per cent.

### A New Fish Story

A gentle dwells in the salmon runs of the Fraser River. Four men from New Westminster were shooting down the fast currents in a boat recently, tired and discouraged, for what had started out as a happy hunting and fishing trip, and yielded them naught but bad tempers. There was a swish of water and something glistening shot over the boat's gunwale two and a half feet above the water, fell at their feet, flopping desperately. Twelve pounds it weighed, a salmon.

Many a self-made man might be hanged if he could blame the job on somebody else.

Professor: "I have succeeded in making many animals understand me, but never the leech."  
Assistant: "Try talking America to them."—Il Travaso, Rome.

## Here and There

(404)  
Differences in the price of wheat at Chicago and Winnipeg and regarding the wheat movement in western Canada is due to the view of Canadian wheat owners that its good quality justifies holding it at higher prices while British and continental buyers believe they can obtain their present requirements from the Argentine and the United States, is the explanation of this condition given out in a statement recently issued over the signature of E. W. Beatty, chairman and president of the Canadian Pacific Railway, and Sir Meek Thomson, president of the Canadian National Railway. Until the present impasse between buyer and seller is adjusted there will be a practical stoppage in the movement of grain with consequent serious effects on gross and net earnings of both the rail and water carriers.

Travelling 300 miles north of Edmonton over the waterways branch of the Northern Alberta Railway to Waterways and Fort McMurray, E. W. Beatty, chairman and president of the Canadian Pacific Railway accompanied by a number of directors of the railway, inspected the salt wells and tar sand deposits of the region. Experts of the Canadian Pacific and Canadian National Railways are at present examining these deposits which Mr. Beatty said he was satisfied would be a great asset to Alberta.

Delegates from the Canadian Chambers of Commerce who have been travelling extensively in the west of Canada, mainly over Canadian Pacific lines, have through their national committee reiterated their stand in favor of a continuance of assisted immigration of selected British settlers of a desirable type to Canada.

Charles Reid, of the Banff Springs Golf Club, won the Prince of Wales golf trophy, famous and valuable prize of gold, from a field of 422 competitors, recently. His score was 144 net, his handicap being 17. This is the first time in the history of the competition that the cup has gone to a Banff player, Calgary golfers having taken it to that city on each of the four former competitions.

Canada's reindeer industry takes a big forward step this year with the trek of 3,000 northern animals from Alaska into the Dominion. In November, this herd, secured by Canada from the United States herds in Alaska, will begin a trek which will take 18 months and will land the animals in 1931 on the Arctic coast east of the Mackenzie river.

Australians are "fiercely loyal" so far as Empire Trade is concerned, and buy, for example, 98 per cent. of their automobiles, from Canadian manufacturers, Sir James Murdoch, member of the Legislative Assembly of New South Wales, told the Vancouver Canadian Club recently. Sir James had just returned from a cross-Canada tour by Canadian Pacific lines and was on his way back to Australia.

Settlers in the Peace River country have a definite uniformity of outlook regarding the progress of the country as a whole, said Col. J. S. Dennis, Chief Commissioner of Colonization and Immigration of the Canadian Pacific Railway, who has been inspecting the northern part of Alberta over the Northern Alberta Railway. He was astonished at the readiness of the Boards of Trade and individual business men to take a large view even where it might mark temporary hardship locally.

Musicians under the leadership of Flight Lieutenant John A. Amers, forming the band of the Royal Air Force, Britain's youngest military band, landed recently at Quebec from Canadian Pacific liner Montclair, for a tour of Canada from coast to coast, as did the band of the Coldstream Guards last year. This aggregation was formed in June, 1929, and since then has fulfilled engagements all over the British Isles. The band will play in all the principal centres, military centres and garrison towns of Canada during their tour here.

"First call for dinner!" "Last call for dinner!" The old monotonous warning to the hungry traveller is a thing of the past on the Trans-Canada Limited. C. P. R. trans-continental crack train from Montreal to Vancouver. To-day a nattily attired waiter in white coat and apron with a smart black bow tie walks through the cars ringing "chimes" on a dulcimer, an appeal at once more pleasant to the ear and more likely to attract attention than the former method. In time, there is no doubt, the idea will be adopted on all dining car trains of the railway.

Advised to make the trip from Montreal to London in nine days, the Canadian Pacific freight ship Beaverbrae actually completed the run in eight days and twenty hours, making record time for a freight vessel between the two ports. This ship is one of the five "Beaver" ships making up the new fast freight steamship service of the Canadian Pacific. They have refrigerated cargo space and are of 10,000 tons dead weight. The service is between Montreal and London, and there is a sailing from the Canadian port every Friday. The vessels as a rule making better time than most passenger vessels on the London route.

## VIKING

Local C. N. R. passenger trains have recently been equipped with laminated boards for use as card tables. These are provided to give a little extra service, and it is desired that they be made use of.

The auction sale at the Andrew Orr farm on Tuesday drew a large crowd and the goods and chattels offered for sale brought fair returns. Mr. Orr and family expect to leave shortly for Montreal to make their home.

C. Almgren reports the sale of two Ayshire heifers to J. J. Richards of Red Deer, who is a well known breeder of this type of cattle throughout the province. In fact Mr. Richards was judge of cattle at the Viking fall fair, and was so impressed by the excellent breeding of Mr. Almgren's Ayshires that he decided to add some to his herd.

Mr. and Steve Jones, Miss Dorothy and Walter motored to Calgary over the last week end and paid a visit to relatives and friends. We understand that "Buzz" has entered the technical school.

The new cement tennis court will soon be ready to play on. The fine warm weather has assisted greatly in the early finish of the work. Viking now has one of the few cement courts in the province.

Mrs. Frank Slavik will attend the C. W. L. convention being held at Vermilion on Friday, Saturday and Sunday as delegate from the local C. W. League. She will be accompanied by Mrs. J. L. Slavik.

Mrs. Meeton and little daughter are receiving medical attention at the Royal Alexandra hospital in Edmonton, and we understand they are progressing quite favorably.

Some of the new opera chairs for the Community hall arrived this week. They are a great improvement over the ordinary chairs and are comfortable and easy.

There are four license plates at the News Office: No. 78-394; 58-084; and 58-379; and 47-426. Owners will please call and get them as soon as possible.

Mrs. W. H. G. Sinclair and little daughter Marjorie, who have been guests at the home of Mr. and Mrs. Chan Collins for a few days left for their home in Edmonton last Thursday evening.

R. A. Zerber, the Holden jeweler, was a business caller in town on Tuesday.

The Jarow Community Club are holding a dance in their new hall on Friday evening of this week.

A Masquerade Dance will be held at Mooreville School on October 25th. Gents 50c Ladies please bring lunch. Good music. Everyone welcome.

The premises recently occupied by the Christie Grant Co. are being renovated and remodeled and will be opened as a cafe in a short time.

Mrs. Chan Collins will be the soloist at the meeting of the Women's Institute to be held at the home of Mrs. Adams on Thursday afternoon of this week.

Mr. and Mrs. E. O. Whitlam, of Saskatoon, have been guests at the C. B. Purvis home for a few days. Mrs. Whitlam is a sister of Mrs. Purvis.

What is expected to be one of the most popular events of the fall season is the Novelty dance to be held under the auspices of the Viking Elks in the new Community hall on Wednesday, October 23rd. Music will be furnished by the Jolly Sparks. Noise makers, etc., furnished to all who attend. Usual prices prevail. Don't miss it. Tell your friends in other towns that the big time is on at Viking on Wednesday, October 23rd.

A meeting of teachers and the parents of school children will be held in the Viking school building on Tuesday evening, October 22nd for the purpose of discussing school matters. All parents are cordially invited to attend. The meeting will be called at eight o'clock.

The W.C.T.U. Mothers' meeting at the home of Mrs. Basil Hilliker was well attended.

Miss Duke of Alice Hill school dealt with the subject of Social Hygiene under several headings, giving greatest attention to the problem of the feeble minded. Mrs. Collins sang most acceptably and graciously responded to an encore.

On Friday afternoon of this week at 3.30 Mrs. Hyslop is entertaining the W.C.T.U. and will report on her recent visit to the provincial Convention at Calgary.

On Sunday, October 13th, Harvest Festival Services were held at the Anglican Church. The Church was most beautifully decorated by the ladies of the W. A. with Fruit, Vegetables, flowers and foliage. The services were well attended and the singing most hearty. The Rector preached at all the services. The gifts of fruit, vegetables, eggs and bread were conveyed to the Viking Hospital on Monday by Mr. Churchyard Clark.

## Limp in -- Leap out

IF YOU "LIMP IN" TO US WITH VALVE TROUBLE WE GUARANTEE YOU WILL "LEAP OUT."

WHY?

Here's what we do on each valve job:

Recondition valves and seats with up-to-date machinery—Clean Carbon—Polish Stems—Clean Guides—Clean Spark Plugs—Clean and adjust Carburetor—Clean Vacuum Tank—Check Ignition—Inspect Wires—Adjust valve timing and tappets—Tune Motor. We use the finest electric equipment for our valve and seat-reconditioning. Have you seen it?

### Five Braw Highland Lassies

They came from Vancouver with a number of others, all pupils of Miss Jean Gauld (centre), to enter the lists at the Banff Highland Gathering. They all had their fling and their seann triubhas and sword dance too—to the tune of the piper.

### Feature of Ontario Winter Carnival

1. Entries in the dog race.  
2. Figure skaters in action.  
3. Ski-joring at Preston Springs, Ontario.

Reports of thrilling dog derbies from Banff, Quebec City and other winter sports centres in Canada, have had their effect upon the boys of Preston Springs, Ontario. The three lads in the above photograph spent many days training their collies to run between the traces in preparation for the winter carnival which was held at that popular resort recently. If the boys lacked in real huskie dogs they had been reading about, they lacked nothing in enthusiasm for their big race.

The annual winter carnival at Preston Springs provided the utmost in snow-shoeing, skating, skiing and all kinds of winter sports. Prominent speed and figure skaters gathered for the events from many parts of Canada and, from across the border, annoyance of the boys. The only huskie entry was rendered 'hors de combat' and relegated to obscurity as far as the race was concerned, by the peaceful-looking collie in the centre.

Preston Springs' proximity to Toronto has made it popular as a winter sports gathering place. Many clubs in Ontario sent representatives to compete in the events including the well-known Toronto Skating Club. A camp fire now-and-then concluded the festivities of the annual carnival. The grounds of the Preston Springs Hotel were thrown open to the merry-makers, who availed themselves of the opportunity thus afforded for outdoor fun.

### Nome Hero, Derby Winner

Leonhard Sepella, hero of the famous race to Nome, is congratulated on winning the Seventh Eastern International Dog Sled Derby at Quebec. He covered 123 miles in eleven hours, six and a half minutes with his sturdy team of Siberian huskies.

Dog sled derby records were broken and new ones established during the three days of the race. Dupuis, who finished second, made a world's record when he completed the first lap of 41 miles in 3 hours, 22 minutes, 42 seconds. Of the nine who finished the three laps, only two took as long as the first Derby winner at Quebec in 1923, demonstrating that harder and speedier dogs have been developed for sled work since then.

## WORLD HAPPENINGS BRIEFLY TOLD

Farmers in Alberta who suffered damage to their crops by August hailstorms have been paid a total of \$575,000 by the Alberta Hail Insurance Board.

The Dornier aeroplane works announces that the new huge 12 motor Dornier D-XX seaplane recently constructed by the company would attempt a flight to America in mid-January, 1929.

A commission of inquiry into the causes of the recent outbreaks in Palestine was appointed at London, England, by Lord Passmore, British Colonial Secretary, it has been officially announced.

A report on a special shipment of garnet wheat to Great Britain will likely not be made public until near the end of the year, it was stated at the Department of Agriculture recently. It will require that length of time to gather all the data.

A report has been issued from Professor Esigberg's surgical university clinic that three Austrian bacteriologists, Edelmann, Shoenhauer and Schloss, have confirmed previous experiments, which indicated discovery of anti-cancer serum.

The differences between Great Britain and the United States regarding disarmament as affecting cruisers, have narrowed to a mere question of three cruisers carrying 8-inch guns, and also a tonnage of 15,000.

The Irish Free State will be a candidate for a seat on the Council of the League of Nations at the next election, it was stated in ministerial circles. When Canada's three-year term expires the Free State is considered to have a good prospect of getting a seat.

## Chinese Massacre Moslems

### Three Thousand Slain Because They Rebelled Against Authorities

Reports from Central Kansu province stated that Chinese had executed an appalling massacre of Moslems there, the victims numbering at least 3,000. Details were lacking, but it seems the Moslems rebelled against Chinese authorities, whereupon they were slain.

According to reports, the executions were carried out under guise of a conference with the Moslems. The victims were separated from their wives and then put to death. According to the reports the Moslems died stoically.

It is indicated that the Chinese now fear Moslem retaliations, possibly causing renewed civil war, which in 1918 caused the death of many thousands of Chinese and Moslems in Kansu.

London is now regarded as the centre of the stamp collecting world.

## The History Of Vaccination

Vaccination Recognized As the Only Efficient Means By Which Small-Pox Can Be Controlled

Sir William Osler, the famous medical man, once remarked that "There is always a group of individuals in every community of that peculiar order of mind which renders them incapable of sane judgment and who seek in every way to oppose vaccination and re-vaccination, not only for themselves but also for others."

We have found this to be so in Canada, and we have not the slightest doubt that if a small-pox epidemic were to make its ghastly presence felt tomorrow, there would be the usual handful of people to raise a hue and cry against vaccination.

Yet vaccination is recognized by all public health administrators as being the only efficient means by which this disease can be combated. And it is equally true that vaccination properly performed is absolutely devoid of danger to life or health. Let us look back into the pages of history and find out what was going on before vaccination was introduced. We find that not ten years passed during the seventeenth century without the occurrence of devastating epidemics of small-pox in Europe. Small-pox was the king of diseases prior to the discovery of vaccination in 1776. A French writer, Monsieur de la Condamine, said that it was the cause of one-third of all the deaths among mankind.

Macauley, the English historian, in writing about conditions in his country says: "The havoc of the black plague has been far more rapid, but the plague visited our shores only once within the living memory, but the small-pox was always present, killing the churchyards with corpses, leaving on those whose lives were spared the hideous traces of its power, turning the babe into a changeling at which the mother shuddered; making the eyes and cheeks of the betrothed maiden objects of horror to her lover."

In fact, Macauley concludes, "Small-pox is the most terrible of all ministers of death."

Mexico was stricken with an epidemic in the sixteenth century, and 3,000,000 of its inhabitants died, leaving scarcely enough people in some centres to bury the dead. The historian Godfrey records that 2,000,000 citizens of Russia died of small-pox in a single year. Whole tribes of American Indians were wiped off the face of the earth by the scourge. Before there was vaccination in the British navy, one fifth of all the enlisted men died of small-pox. Sir Gilbert Blanc tells us in his writings. In 1653 white tails of men in Brazil were cut down. Iceland was invaded by the disease seventeen times prior to 1707. In Czar's history of Greenland, we find that in that year 18,000 people died of small-pox out of a population of 50,000. The dead lined the streets, houses were depopulated, misery was everywhere.

Nowadays, while we encounter small-pox in serious proportions, there is nothing to match these figures in present day history. So you see, we have plenty of reason to be grateful to Dr. Edward Jenner, the Englishman who gave vaccination to the world.

Vaccination was discovered by Jenner, an Englishman. About 1760, a dairymaid living near Bristol visited a young student named Jenner. Although she was suffering from a rash, she confidently asserted that it was not possible for her to get small-pox because she had already had the cow-pox.

This little incident had the same effect on Jenner as the falling apple had on Newton. The young scientist started thinking, and it was not long before he was a world-renowned scientist. As a result of his experiments, six years later, he inoculated an eight-year-old boy from one of his patients who had cow-pox. A mild case of cow-pox ensued with no serious effect. Two months later the boy was inoculated from "a pustule of a patient suffering from small-pox. No illness resulted and it was repeated. When there was still a ill effects, the young scientist Jenner knew that he had discovered something. He gave his knowledge to the

Dr. Guild's GREEN MOUNTAIN ASTHMA COMPOUND

## Breaks Up Gas In the Stomach

Don't suffer from dangerous gas pressing around your heart, from sourness, acidity, bloating or pain of indigestion, stop worrying. Whenever you need quick stomach relief take a little liquid, pleasant-tasting, harmless, and keeps the stomach sweet and strong, and digestion perfect. At all good drug stores.

world in the form of a paper published in London.

On this continent the first vaccination performed was by Dr. Boylston on his own son in Boston. One year after this he inoculated 241 people, and every one escaped the terrible epidemic that had engulfed New England at that time.

Of course, there was a violent demonstration against Dr. Boylston as might be expected. Even some members of his own profession turned against him. From the pulpit he was denounced and treated with contempt. Every method of interference was used, just as they are used today. Ben Johnson was one of the scoffers and he wrote that, "I will never owe my health to a disease." Benjamin Franklin opposed vaccination with a facile pen, but when he lost his own son through small-pox, he became a staunch advocate, and in his autobiography bitterly lamented the fact that he had not had the boy vaccinated.

You will readily see that vaccination has its support in history, as well as the support of virtually every doctor of standing on the continent. From the time when it was first discovered, vaccination has steadily proven its value to men.

There is an abundance of evidence to be obtained for those people who sincerely want to weigh the facts between the dangers of small-pox as a disease, and the harmlessness of vaccination as a preventive. People of sound judgment will not hesitate which to choose.

## Recipes For This Week

(By Betty Barclay)

### BANANA CUSTARD WHIP

- 1 package lemon junket.
- 1 pint milk.
- 3 bananas.
- 1 egg white.
- 1/2 cup sugar.
- 1 tablespoon lemon juice.

Warm the milk until lukewarm—not hot—and dissolve the lemon junket in it. Have two of the bananas sliced into the dessert glasses; pour junket over them. Let stand in warm place until set; then chill. Mash the remaining banana, add egg white, sugar and lemon juice, beating until thick. Add as topping when ready to serve.

### PICKLED REDS

Pickled sweet red peppers make a delightful garnish for cold meats or salads. Wash and dry peppers thoroughly, then cut a slice from the stem end and remove seeds. Cut either in thin strips with scissors or into ribbons by working around and around the pepper with a sharp knife. Scald well then drop into ice water to crisp. Drain well. Make a syrup, using a proportion of one cup sugar to two cups vinegar. Put peppers into clean, hot jars, fill to overflowing with hot syrup and seal.

## Permanent Civil Servants

### 1,900 Employees Of Federal Government Attain New Status

With the passing of an order-in-council, which has an important bearing on the pensions branch of the Department of Pensions and National Health, 1,900 employees in this branch become permanent civil servants. It dates from June 1. The pensions branch of the department has now been made permanent, and the civil service commission has classified the employees engaged in this work.

About 450 government employees in Ottawa are directly affected by the change; about 450 in Toronto, 250 in London, Ont.; 155 in Vancouver, 84 in Winnipeg, 72 in Calgary, and smaller numbers in other Canadian cities where the department operates hospitals for disabled veterans.

A new map of Ireland with names in Gaelic instead of English hangs in every schoolroom of the Free State as part of an effort to restore general usage of ancient Irish speech.

### Not Dependable

According to Dr. Morris Fishbein, "a man's testicles are his hair and teeth." And, said to relate, even they are sometimes false.

## Making Highway Safer

### Manitoba Man Invents Spreeder To Eliminate Loose Gravel Menace

Gravel, remaining loose at the side of the highway, seems to have been one of the main troubles with which those responsible for road programs on the prairie have had to deal during the past two seasons. Many methods have been used to try and overcome this state of affairs, but to date nothing practical has been brought to light.

A suggestion, however, has presented itself in a new gravel spreeder, as designed by W. G. Smith, of Rosburn, Man., which was demonstrated recently on the Emerson Highway. The demonstration revealed that the job could be done with the minimum of trouble and expense.

The new system is that of funneling a four foot wide strip of gravel down the centre of the highway, eliminating excess gravel on the two sides. This gravel is laid down in a perfectly smooth ribbon, and if necessary a car can easily cross it.

The chief advantage in this system would be to eliminate the loose gravel at the sides, where the greatest danger to motorists lies at the present time. On hitting this loose gravel, when travelling at a fair rate of speed, it is very easy to hurtle into the ditch before the driver can gain control of his car.

The new system would also eliminate the error so many practice—that of driving on the wrong side of the road, as the centre line would automatically keep the drivers on their own side of the road.

This centre line of gravel would of course have to be put a few inches in depth with the top, so that it would not be dangerous for cars to cross it.

## Destroying Mountain Flower

### Edelweiss Threatened With Extinction Due To Ravages Of Tourists

Edelweiss, the famous Swiss mountain flower, is threatened with extinction due chiefly to the ravages of tourists.

Several Alpine regions where the plant formerly flourished have reported that it is now very rare. Edelweiss does not spread rapidly even under normal conditions.

A Bavarian botanist estimated recently that in a certain mountain area, there were 26,000 roots of Edelweiss, in 1920. At the end of 1923 he said, only 600 remained.

## Took Year To Cool

### Mirror For Telescope Weighs Ton and a Half

A huge mirror which took nearly a year to cool down has been made in America for a large reflecting telescope. Weighing more than a ton and a half, it is 60 inches in diameter and 10 inches thick. Discs of glass of this great size are very difficult to get free from defects, and after the molten glass is poured into the mould it has to be kept hot by electric heaters and cooled down over a period of many months.

## Gave Police The "Jumps"

What was thought to be a "time bomb," opened in haste by post-office employees at Ranger, Texas, was found to be a quantity of Mexican jumping beans bumping against the tin lid of their container.

Rome had no public postal system, but slaves delivered their masters' letters.

# When Babies CRY

Babies will cry, often for no apparent reason. You may not know what's wrong, but you can always give Castoria. This soon has your little one comforted; if not, you should call a doctor. Don't experiment with medicines intended for the stronger systems of adults! Most of those little upsets are soon soothed away by a little of this pleasant-tasting, gentle-acting children's remedy that children like.

It may be the stomach, or may be the little bowels. Or in the case of older children, a sluggish, constipated condition. Castoria is still the thing to give. It is almost certain to clear up any minor ailment, and could by no possibility do the youngest child the slightest harm. So it's the first thing to think of when a child has a coated tongue, won't play, can't sleep, is fretful or out of sorts. Get the genuine; it always has Chas. H. Fletcher's signature on the package.

# Head Colds relieved with vapors

SNUFF A little Vicks well up the nose or melt in a spoon or cup of hot water and inhale.

Medicated vapors reach the air passages direct.

For other cold troubles rub Vicks on throat and chest.

acts 2 ways at once  
**VICKS**  
VAPORUB  
OVER 15 MILLION JARS USED YEARLY

## West Going Ahead

### Development Taking Place On All Sides Says C. N. R. President

"There is a silver lining to the cloud insofar as the situation in western Canada is concerned," stated Sir Henry W. Thornton, chairman and president of the Canadian National Railways, on returning to his office in system headquarters, Montreal, after a tour which took him throughout the western provinces and to the Pacific Coast. "While it is true that the west is not harvesting such a voluminous crop as in average years, and it is also true that some farmers and some districts are hard hit, it must be remembered that there are districts and farmers in those districts who have harvested better crops than they anticipated a short time ago, and who are reaping the benefit of higher prices from their held-over grain from last year, and also higher prices for the grain which they have produced in 1928."

"The west has gone ahead and is going ahead; building up on a basis of sound progress and one going from the east cannot fail to be impressed with the same development which is taking place on all sides."

"On the Pacific Coast in particular, the development of trade with the Orient is being closely followed, and there is also a keen realization of the fact that Canada is sharing and will share to a greater degree in the further development of that trade," Sir Henry said, concluding with the statement that he had inspected the properties of the system in each of the provinces visited and he had found things in good condition everywhere with the officers and employees keenly on the alert to provide the best service to its patrons.

## Answer Was Correct

A census clerk in scanning one of the forms sent to it had been properly filled up, noticed the figures "120" and "112" under the heading "Age of father, if living," and "Age of mother, if living." But your parents were never so old, were they? asked the astonished clerk. "No," was the reply, "but they would have been if living."

"Are you really a doctor of philosophy now?"  
"Yes."  
"Well, tell me how to keep my temper when the cleaner ruins my best frock."

The pole star is always directly over the north pole.

## The Singing Fool

By HUBERT DAIL

Copyright, 1928, Warner Bros. Pictures, Inc.

### SYNOPSIS

Al Stone, singing waiter at Blackie Joe's New York night club, wins fame as a composer of popular songs. He marries Molly Winton, a ballad singer, and makes her famous too. Molly and Al have a baby, Junior, whom Al adores. Molly becomes interested in John Perry, Al's close friend, and Perry begs her to leave Al. One night, after Al has taken Molly home from the Club Bombo, where he is part owner, she turns on him in rage, saying she doesn't love him. Al believes it is a mood, but when Molly fails to appear at the Club Bombo New Year's Eve celebration he calls her. A feminine voice answers, but he cannot hear the words, as the phone door flies open.

### CHAPTER XVI

Once more Al seized the door of the phone booth and slammed it hard to stay shut this time. Then he turned back to the phone. He suddenly decided that he must make things up with Molly now—he would cast all pride aside and frankly beg her to do it.

"Sweetheart," he pleaded, "let's start the new year right. If there's anything I've done, I'm sorry. Let's make up."

There was a long silence, then the faint murmur of a feminine voice whose words he didn't understand. A start of fear shot through him, but he persisted.

"I love you, Molly, you know how I love you. I can't bear to have you cold toward me!"

"Now the voice at the other end was stronger; he suddenly realized it was not Molly's voice at all, but the maid's. He heard her quick, distraught words come travelling over the wire like bullets.

"Mrs. Stone is not here! She has gone away." Al exclaimed.

"Gone away?" Al exclaimed. What do you mean?"

"Yes, sir; Mrs. Stone has packed up her things and gone. She left a letter for you."

Packed her things! Left a letter!

WHEN a cold or exposure brings aches and pains that penetrate to your very bones, there is always quick relief in Aspirin. It will make short work of that headache or any little pain. Just as effective in the more serious suffering from neuralgia, neuritis, rheumatism or lumbago. No ache or pain is ever too deep-seated for Aspirin tablets to relieve, and they don't affect the heart. All druggists, with proven directions for various uses which many people have found invaluable in the relief of pains and aches of many kinds.

Aspirin is a Trademark Registered in Canada

W. N. U. 1504

ing out a letter. He seized it and the maid discreetly retired.

Al had a terrible dread of opening it, but he nerved himself to the task and ripped back the envelope flap. Then he read the fateful message in Molly's distinctively vertical handwriting:

"I'm leaving—don't try to persuade me to come back. I don't love you—I never did love you. It was hard enough to bear before John Perry came into my life. Since then it has been impossible."

Al looked up from the letter with a cry of rage and pain. For the first time he saw the whole situation in one blinding flash. Molly not only failed to love him, but she loved someone else. And that someone was John Perry—suave, immaculately dressed John—who, Al had believed, was his best friend. He realized now that Perry, whom he had trusted implicitly, had betrayed that trust from the first. Then another phase in the letter seemed to throw inside his brain—Molly said she had never loved him. She had lived a lie from the moment she said she would marry him!

For a moment this sense of bitter rage and contempt dominated all other thoughts and emotions in him. The sense of being cheated, not only once but consistently for days, weeks, months, years, made him long to turn on both Molly and John Perry and blast them with scorn. He recalled the countless times he had overlooked Molly's petulant moods, selfish caprices and savage outbursts of anger, always believing that she was loyal and fine underneath.

Now, suddenly, his thoughts turned to Junior, and he read on:

"I was going to leave the baby, but he woke up as I was leaving. He held out his arms to me and, after all, he is more mine than yours."

"MOLLY."

Al ran to the nursery. The dresser drawers had been pulled out and there were evidences of hasty packing all about. Some of Junior's toys lay scattered about the floor, among them his favorite, a woolly dog. His pillow had been thrown in the corner.

Al stood, dazed, gripping the foot-piece of Junior's bed. Where had he suddenly taken his boy?

For a moment Al was possessed by the determination to find Molly and Junior tonight—then he realized that the plan was futile. In this city of seven million persons and countless skyscrapers, how could he and John Perry could have taken Junior, hiding away without difficulty.

After that note Al did not doubt that Perry was with Molly. Perhaps even now they were speeding toward Boston in Molly's Rolls-Royce, or they might have caught the night limited for Florida several hours ago. He went quickly to the phone and called up the garage.

(To Be Continued.)

**The Poor Man's Friend.**—Put up in small bottles that are easily portable and sold for a very small sum. Dr. Thomas' Electric Oil possesses power in concentrated form. Its cheapness and the varied uses to which it can be put make it the poor man's friend. No dealer's stock is complete without it.

### Sulphate Plant

Large Plant To Be Erected About 60 Miles South Of Moose Jaw

Within the next sixty days, construction work is to be started on a large sulphate plant some sixty miles south of Moose Jaw. The plant will draw the sodium sulphate deposits from Horseshoe Lake, a short distance southeast of Ormiston. By June of next year, it is expected to be in operation. The Barium Reduction Corporation of Charleston, West Virginia, is the company behind the undertaking.

### Minard's Liniment For Warts.

The up-and-coming young man is pretty likely to succeed, unless he is up at four and just coming home.

All things come to those who wait—except the man who owes you money.

### From Youth to Age

There are three trying periods in a woman's life: when the girl matures to womanhood, when a woman gives birth to her first child, when a woman reaches middle age. At these times Lydia E. Pinkham's Vegetable Compound helps to restore normal health and vigor.

LYDIA E. PINKHAM'S VEGETABLE COMPOUND

### May Leave Lonely Island

But Proposition Not Favorably Received By Inhabitants Of St. Kilda

One of the most romantic—and the loneliest—places in Britain may soon be left to the sea-birds. This is St. Kilda, the little group of islands in the Atlantic, whose population has now dropped to thirty-eight. At the beginning of this century it was seventy-seven, and in 1851 it was 110. It has now been proposed that the island should be evacuated, and homes found for the inhabitants on the mainland. There are some hundreds of sheep on the island, but these are kept for their wool, and only used for food if the supplies run short. Sea-birds' eggs and young sea-birds are the principal articles of diet, with potatoes when the crop is good—which isn't always the case. The life of the islands is thus a hard one, and the fare is apt to grow monotonous. But the St. Kildans are attached to their homes and don't want to leave them. The population, if now very small, was smaller still 200 years ago, when, following a smallpox epidemic, the numbers of the islanders were reduced to thirty.

### GOOD IN EVERY WAY

Baby's Own Tablets Banish Babblyhood and Childhood Ailments

A medicine that all mothers praise—one good in every way—one that will quickly banish the minor ills of babblyhood and childhood is the medicine to keep in the medicine chest; to always have on hand in case of emergency. Such a medicine is Baby's Own Tablets—they are helpful at all times. They are a mild but thorough laxative, which by regulating the bowels and stomach, banishes colds and simple fevers; corrects constipation and indigestion; relieves colic and diarrhoea and makes the cutting of teeth easy.

Thousands of mothers use no other medicine for their little ones. Among them is Mrs. J. H. Bromley, Westmeath, Ont., who writes: "I have four children and whenever any of them are ill, I always give Baby's Own Tablets and have found them good in every way. I would not be without the Tablets and would also like to little booklet, 'Care of the Baby in Health and Sickness.'"

Baby's Own Tablets are sold by medicine dealers, or by mail at 25 cents a box from The Dr. Williams' Medicine Co., Brockville, Ont.

### Museum Of Antiques

Many Amusing Things Seen At Garden Fete In London, England

I heard of an amusing side-show held at a garden fete recently, writes "Looker-On" in the London Daily Chronicle. It was called a Museum of Antiques, but the nature of the exhibits may be guessed from the following specimens: A gigantic safety-pin, four inches long, which in the 90's held blouse and shirt from parting company; dangerous-looking daggers, over a foot long, labelled but pins of 1609; a length of braid, one edge of which appeared frayed, but a skirt about five yards in diameter was also shown with this braid sewn round, apparently to sweep up the mud or the streets; a lingerie blouse, fastening up the back with innumerable tiny hooks and eyes which, not being rustless, had marked the cambric with iron mould, and there were other surprising relics in favour with our mothers and grandmothers.

### Courtesy Of The Road

Majority Of Drivers Have To Suffer For Carelessness Of Selfish Ones

The majority of drivers are without doubt, safe and considerate; but unfortunately all road users are at the mercy of an ignorant and selfish minority, who seem to imagine that a display of recklessness will be mistaken for an exhibition of patriotism. The cult of the cheap car has not been attended by a corresponding cultivation of good manners. Until the quick-tempered, self-centred motorist learns that there is a code of courtesy which must be adhered to on the King's highway, the innocent will continue to suffer for the sins of the guilty.

The ease with which corns and warts can be removed by Holloway's Corn Remover is its strongest recommendation. It seldom fails.

### Says Farewell To Regiment

The evacuation by the second battalion of the Leicestershire regiment, the first complete British unit to leave the Rhineland, brought stirring farewells scenes. Practically the entire population turned out in the drenching downpour of rain to wish the soldiers godspeed.

In Bolivia all the useful minerals belong originally to the state.

For Sprains—Use Minard's Liniment.

HOME-BAKED BREAD IS BEST OF ALL

### Little Helps For This Week

"For, lo, the winter is past, the rain is over and gone; the flowers appear on the earth, the time of the singing of birds is come."—Song of Solomon II, 11, 12.

The year's at the spring, And day's at the morn; Morning's at seven; The hill-side's dew-peared; The lark's on the wing; The snail's on the thorn; God's in His heaven; All's right with the world.

—Robert Browning.

That is not an enviable nature that hears no strange melodies hinting of heaven through the marches of the year; that sees no glorious signs hung out on earth and sky of an infinite love that is never forgetful, and never unkind; that pauses not with reverent spirit to ponder the lesson that is told in grass, and tree, and flower; and that feels no benediction in the bright air and palpitating sky. He may be just to his neighbor, industrious and virtuous; but he does not understand the meaning of Jesus in the fields of Galilee, pointing to the birds and lilies, and telling of our Father's care.—Horatio N. Powers.

### Fertilizer Brings Returns

Increase In Yield Of 11 Bushels To the Acre Is Reported

A piece of land on the Pokran farm in Morden, close by the Canadian Pacific Railway station, was seeded this year with fertilizer by the experimental farm of the district. It yielded 41 bushels of wheat to the acre, as compared with a yield of 30 bushels in an adjoining lot, unfertilized. It is said that the fertilizer returns its value to the soil for three years.

Cora: "I wonder why he's a bachelor?"  
Dora: "Oh, he didn't have a car when he was young."

### Meteors Falling On Earth

Will Make Planet Heavier, Says Professor Of Observatory In South Africa

The earth is putting on weight, says Dr. Luyten, of Harvard Observatory, at Bloemfontein, South Africa. He said that the number of meteors falling upon the earth was in the neighborhood of 30,000,000 a day. "No matter how small they are," he said, "the total weight of a crowd like that is going to count in the long run." He declared that the ultimate effect would be to slow down the rotation of the planet and lengthen the day. Since the change in the length of the day will not be more than one-thousandth of a second in a million years, there is plenty of time for geologists to think out some sort of reducing process.

**The Oil For the Farmer.**—A bottle of Dr. Thomas' Electric Oil in the farm house will save many a journey for the doctor. It is not only good for the children when taken with colds and croup, and for the mature who suffer from pains and aches, but there are directions for its use on sick cattle. There should always be a bottle of it in the house.

The best light enters a room through the upper third of the window, the U.S. Public Health Service reminds us.

Neon light signs are now popular in China to advertise restaurants, business houses, and newspapers.

### Good for Cattle

Keep Minard's in your barn for distemper and colic. An excellent first aid for you stock.

## Ideal--Wherever alterations are required

IN many a fine, old-fashioned farm house there are rooms much larger than people today consider necessary. This available space can be partitioned off into extra rooms with very little work and at surprisingly small cost by the use of Gyproc Fireproof Wallboard. And the Gyproc walls and ceilings of the new rooms will match the older walls—no matter how solid they are—for seasoned rigidity, good looks and permanence.

Gyproc is the perfect building material for all modern farm construction—for homes, barns, poultry houses, granaries and garages. It is pure rock—cannot warp, shrink or burn. With the use of joint filler and tape its sections meet in a tight, flush joint that insures a flat, smooth surface and takes any decoration.

Board, ceiling, high sections of Gyproc can be nailed directly to joists and ending—no construction with a minimum of labor.

Beautiful decorative effects can be obtained by applying Alabaster, paint, paper or plaster, over Gyproc walls and ceilings.

## Main Street

Mr. and Mrs. P. J. Hardy intend motoring to Edmonton Friday.

Mr. and Mrs. D. Glasgow motored to Edmonton Thursday.

Mr. and Mrs. R. J. Tate have been spending a few days in the city.

Mr. H. Kasten has been spending a few days in the city.

Irma Ladies Aid will meet at the home of Mrs. Roy Askin next Thursday afternoon.

Mrs. Jas. Hern left Wednesday evening to spend a few days in Edmonton.

Mr. Carl Finch motored to Edmonton Sunday and secured his rifle and shotgun which was stolen out of his office last July.

If you intend seeing "The Donovan Affair" at Hardisty this week cut out the coupon in another part of this paper and use it.

Mr. Thos Shaw is having an addition built on the front of his house on Main Street.

A ladies silk scarf was taken by mistake from the dance, Saturday night and has been left at the Times Office, where the owner can secure same.

We are glad to report that Mr. Jas. Donohue is doing nicely after being taken to the Hardisty hospital last week end, when he was suffering with a hemorrhage.

About twenty members of the Irma I.O.O.F. Lodge motored to Killam Monday night where they visited the Killam Lodge and exemplified the first degree.

Most of the schools in the Irma district have been closed the last three days to give the teachers a chance to attend the Convention being held at Hardisty.

About thirty members of Mannville Masonic Lodge visited with the Irma Lodge Monday night when a very enjoyable evening was spent. A return visit will be made by the Irma Lodge in about two weeks.

Mrs. R. D. Smallwood was operated on in the Royal Alexandra hospital at Edmonton Wednesday morning. Mr. Smallwood telephoned friends at Irma stating that the operation had apparently been successful and Mrs. Smallwood was resting nicely.

Readers of The Times who intend to see the talking pictures at Hardisty, October 24th, 25th and 26th should take advantage of the coupon that appears for the Kiefer shows at Hardisty, in connection with the "Donovan Affair."

Mr. Eric Larsen reported being held up on the highway between Irma and Wainwright early Saturday when he reports having been relieved of some thirty dollars. Apparently there is some mystery about the hold-up. Mr. Larsen and his family left the first of the week to spend the winter in Washington.

A number of the members of the Irma Lodge No. 56 I.O.O.F. drove down to Chauvin last Wednesday night to attend the annual district meeting of this district No. 24. Messrs M. Knudson and Wilbraham being delegates from Irma. At this meeting Mr. F. M. Hill was nominated for the chair of District Deputy Grand Master for this district for the year 1930 and Mr. A. E. Foxwell as District Deputy Grand Secretary, both of Irma. All those who went down reported a wonderful time more so those who came back in Julius Stougaard's car.

Wednesday afternoon Sergeant Stewart of the Wainwright detachment A. P. P. held court in Irma when Mr. W. H. King, J.P. committed Geo. DeCalvert for trial for stealing \$17.95 from Pat Holler, with whom the accused slept Tuesday night. Evidence was produced to show that DeCalvert had been broke the previous day, but when searched by the police Wednesday forenoon practically the amount lost by Holler was found on his person. DeCalvert has been in the Irma district for some time and has taken part in several boxing tournaments.

### Birch Lake.

The annual fowl supper and dance to be held by the Woodville local U. F. A. and U.F.W.A. will take place on November 1st. Arrangements are being made for a short program. Admission 75c for the evening.

Mrs. Ada Stearns who went to Rochester, Minnesota, for an operation some time ago is progressing favorably.

Mr. Scott, of Lewiston, Idaho, is looking after business interests in this district.

A. Petrie, who spent several years in this district is here for a visit with friends.

Mrs. C. E. Stearns, Miss Allan, Miss Swanson, Miss Wilson and Mr. H. B. Stearns, motored to Edmonton and spent the week end.

Mr. and Mrs. G. P. Young visited Mundare a short time ago.

C. C. N. Farrington, of Killam was a Sunday visitor at the C. E. Farrington home.

Mr. and Mrs. R. Dodd visited friends near St. Paul over the week end.

## The New Triumph Marconi

### Batteryless Console

The performance of this new Marconi model sets a new high standard in the field of Batteryless Radio.

Powered with nine of the latest "AC" Radiotrons, it operates direct from the house lighting current, furnishing the sensitive selectivity and tone brilliancy that will satisfy the most critical.

Built into its handsome two-tone matched walnut cabinet is a Superb Dynamic Speaker, assuring a smoothness and a fidelity of reproduction over the entire musical scale. Rattle or distortion is pleasingly absent from reception even when operated at roomfilling volume.

Judged by any standard this new Triumph Marconi Batteryless is a Receiver the owner may well be proud of.

Complete with tubes ..... \$268.00  
Batteryless Table Model, Complete ..... \$175.00

### THE NEW TRIUMPH BATTERY OPERATED

CONSOLE, Less Accessories ..... \$160.00
